Worried you don't

Welcome To Conceptions

Thank you for your interest in our monthly newsletter. Conceptions wants to insure you have the tools, education and latest information to help create your family. We are excited to establish an on-going line of communication and relationship with you. We hope you find the following information helpful.

Sincerely,
The Physician's and Staff at CRA

Un-locking the Miracle of life

Conceptions Reproductive Associates of Colorado to be the first in Colorado to test all 24 chromosomes with high reliability.

Assisted Reproductive Technologies (ART) includes a variety of treatment options such as in vitro fertilization (IVF) which have helped thousands of previously infertile couples to conceive. Screening embryos for chromosome errors has been shown to improve a couple's chances of conceiving and delivering a health baby through in-vitro fertilization (IVF). This is particularly important for women above the age of 35, women with a prior history of miscarriage, and women that have had an unsuccessful IVF cycle.

To see if this technology is right for you please visit our website at www.conceptionsrepro.com or call and speak with an IVF RN Coordinator at 303.738.5313

Clinical Study & Research

Now Enrolling for IVF Infertility Study

Conceptions is one of six centers in the United States to participate in a research studies for IVF.

have insurance coverage? Call our billing office at 303.794.8165

To see if you qualify for any of our research studies please visit www.conceptionsrepro.com or www.yourivfstudy.com
You may also reach Melanie B. RN, IVF study coordinator at 303.738.5313
Or for our Egg Freezing Study contact Molly P. at 303.738.5330

Mind/Body Health Groups

Unlike a therapy group, the purpose of group sessions is to provide a "pick me up," that is, to have you feeling better when you leave than when you came in. Strategies for dealing with stress and enhancing overall well being will be explored. We feel that connecting with others who are dealing with the same issues and being assisted by caring professionals will:

- Enhance the outcome of your fertility treatment.
- Help you to be a more active participant in your care.
- Increase satisfaction in your primary/marital relationship.
- Provide you with new techniques to manage stress more effectively.
- Give you a sense of well being.

To register for the next Mind/Body Health Group meeting please contact Cara at CaraB@conceptionsrepro.com or call 303.794.0045

The group meets both at our Littleton & Lafayette locations for your convenience.

Once again, thank you we hope you found this information helpful. Please feel free to contact me for any additional questions.

Sincerely,

Dana Ackerman

Business Development/Physician Relations Coordinator
