<b>2004 IVF Statistics</b>
----------------------------

- Annual Summary -

**I. Summary of all cycles**

Number of patients initiating ovarian stimulation	360
Number of patients to egg retrieval	312
Rate of cancellation prior to egg retrieval	13.4% (312/360)
Number of cycles with embryo transfer	305
Chemical pregnancy rate (all procedures)	58.3% (178/305)
<b>Overall clinical pregnancy rate (all procedures)</b>	<b>48.8% (149/305)</b>

**II. Summary of donor egg cycles (anonymous and known donors)**

Number of donor egg cycles with embryo transfer	55
Percent of donor egg cycles to all IVF procedures	18.8% (55/305)
<b>Donor egg clinical pregnancy rate</b>	<b>72.2% (39/54)</b>

**III. Summary of non-donor egg cycles**

Number of non-donor egg cycles with embryo transfer	250
Percent of non-donor egg cycles to all IVF procedures	71.4% (250/305)
<b>Non-donor egg cycle clinical pregnancy rate</b>	<b>44.0% (110/250)</b>

**IV. Summary of frozen-thawed blastocyst transfer cycles**

Number of frozen-thawed blastocyst cycles with embryos transferred	34
<b>Clinical pregnancy rate after frozen-thawed blastocyst transfer</b>	<b>50.0% (17/34)</b>

**V. Clinical pregnancy rate of non-donor egg cycles according to day of transfer**

Number of patients with Day 3 embryo transfer	140
<b>Day 3 clinical pregnancy rate</b>	<b>33.5% (47/140)</b>
Number of patients with Day 5 embryo transfer	110
<b>Day 5 clinical pregnancy rate</b>	<b>57.2% (63/110)</b>

**VI. Pregnancy rate according to method of insemination** (includes donor egg cycles)

A. Conventional insemination

Percent of conventional insemination cycles to all IVF procedures	72.1% (220/305)
<b>Conventional insemination clinical pregnancy rate</b>	<b>48.1% (106/220)</b>

B. ICSI insemination (includes donor egg cycles)

Percent of ICSI cycles to all IVF procedures	27.8% (85/305)
<b>ICSI clinical pregnancy rate</b>	<b>50.5% (43/85)</b>

\*From the Society for Assisted Reproductive Technology (SART): “Patient characteristics vary among programs; therefore, these data should not be used for comparing clinics.”

\*This data is preliminary. Final data including live birth rates will be reported to SART when available for inclusion in its national report on IVF Statistics.
