

Physicians who care

Conceptions' physicians are some of the finest reproductive experts in the nation. In fact, we have received numerous local and national accolades for excellence in fertility care. Perhaps even more importantly, we share your dream of parenthood and will do everything we can to help you achieve that goal.

Together with the outstanding nursing staff—each with advanced training in women's health—we go to great lengths so you feel welcomed and supported beginning with your very first visit. Conceptions' emphasis is as much on accessibility, personal attention, and emotional support as it is on medical excellence.

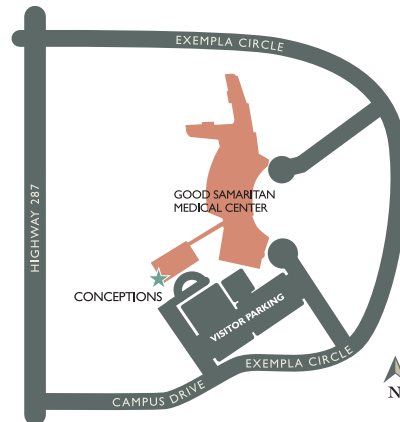

Ours is a genuine concern and personal commitment to helping you succeed in having a child.

CONCEPTIONS
REPRODUCTIVE ASSOCIATES
OF COLORADO

Unlocking the miracle of life.
Fertility Evaluation & Treatment

*Parenthood, family, love, fulfillment.
At Conceptions we understand how
precious these notions are for couples
trying to conceive.*

The path to parenthood can be an unanticipated challenge for some. But take heart, because Conceptions can help with reproductive services that are second to none.

You'll find more than clinical and technical excellence in fertility treatment. You'll find empathy, encouragement, and caring that goes beyond the norm.

Each and every year, Conceptions helps hundreds of couples on a loving journey to build a family. Welcome to Conceptions.

Comprehensive treatment, outstanding results

The good news is that nearly all fertility issues (85-90 percent) are fully treatable. Even better, as a leader in reproductive medicine, Conceptions offers the full spectrum of treatment options in your quest to become a parent.

Our physicians are experts in infertility, and working in partnership with you, will determine the most appropriate course of treatment.

Mind/Body reduces stress and may increase the odds of conceiving

Our Mind/Body program focuses on the relationship between the physical, psychological, social and spiritual aspects of one's life as it relates to fertility. Mind/Body helps you manage the stress of fertility issues through counseling, proper nutrition, and helpful alternative therapies like acupuncture and hypnosis.

Infertility Services

- Complete Initial Consultation (\$175 for those without insurance coverage).
- In-house endocrinology laboratory.
- Insemination cycle management (partner sperm or donor sperm).
- Advanced Endoscopic Surgery (outpatient laparoscopic fibroid removal, endometriosis, ovarian cyst removal, tubal surgery, hysteroscopic resection of septums, fibroids, polyps, scar tissue). For those without insurance coverage, the above procedures are \$6000 for laparoscopy and hysteroscopy, \$3000 for hysteroscopy only (includes all hospital, anesthesiology, pathology and surgeon fees).
- In-house diagnostic and operative hysteroscopy.
- In-house treatment of first trimester miscarriage with chromosomal assessment of placenta.
- IVF, ICSI, assisted hatching, day 5 embryo transfer.
- In-house laser day 5 biopsy of the early placenta allowing full chromosome assessment (23-pair) prior to embryo transfer. This technology can also be combined with single gene disorder screening and allows for parental source of error and confidence calls across each chromosome.
- Cryopreservation of embryos (slow-freeze and vitrification).
- Semen analysis (all three Conceptions offices), sperm cryopreservation, in-house surgical sperm acquisition (epididymal and testicular).
- Donor egg cycles with in-house donor egg candidate pool. www.eggdonorcolorado.com
- Uterine surrogacy cycles.

While reflecting the commitment and expertise of our Center, couples can also save a substantial amount on the cost of services when using in-house as compared to hospital based or agency services.

World-class embryology

Conceptions has consistently maintained some of the highest pregnancy rates in the nation, across all age brackets (see conceptionsrepro.com). We have a proven track record with advanced technologies such as in-house laser biopsy of day 5 embryos allowing full chromosome assessment prior to transfer. Our IVF laboratory is outfitted with the latest technology and equipment and our world-class embryologists are committed to allowing couples to reach their full biologic potential as parents.

Protocol Expertise

The physicians at Conceptions are well-versed in the latest protocols designed to maximize the chances of success in even the most challenging cases, giving invited lectures and authoring papers on these subjects. These include the full spectrum of IVF, IUI, infertility surgery and support protocols to treat conditions which include decreased egg health, male factor, PCOS, hypothalamic and thyroid dysfunction, uterine and pelvic anatomic conditions impacting fertility and recurrent pregnancy loss.
